

ULTRAC SESSANTA

INNOVATION MEETS DESIGN

FEATURES	BENEFITS
Innovative design and sophisticated line pattern	Outstanding grip, performance and unique appearance
Parametric design: per size the most optimal contour, tread and construction	Excellent characteristics on wet and dry road surface
Handling Tuned Tread Compound (HTTC)	Extremely high track power, allowing faster cornering. Controlled correction of the car is also possible in bends
HTS+ (Handling Tuned Sidewall) principle with the road surface	Direct steering response and optimal contact
Two rayon carcass layers make the tyre stable and sturdy	Maximum resistance to lateral forces Controlled handling in critical situations
